Butterfly.—The upper side is immaculate gray; beneath pale, with two ferruginous transverse lines. Between these lines is a ferruginous line on each wing, rudely describing a circle. In the circle on the fore wing are three or four eye-spots with a blue pupil and a yellow iris; in the circle on the hind wing are six eye-spots which are oblong and have the pupil oval. Expanse, 1.25 inch.

Early Stages.— These have been fully described, and are not unlike those of other species of the genus. The caterpillar feeds on grasses.

The insect ranges from New Jersey to the Gulf of Mexico as far west as Texas.

(4) Neonympha eurytus, Fabricius, Plate XXV, Fig. 4, 3 : Plate III, Figs. 3, 6, 10, 13, 14, *larva;* Plate IV, Fig. 28, *chrysalis* (The Little Wood-satyr).

Butterfly.—Easily distinguished from other species in our fauna by the presence of two more or less perfectly developed ocelli on the upper side of the fore wing and also of the hind wing. Expanse, 1.75 inch.

Early Stages.—This is a rather common butterfly, the larval stages of which have been fully described by various authors. The egg is even taller in proportion to its breadth than that of N. gemma, which it otherwise closely resembles in outline and sculpturing. The caterpillar is pale brown, conformed in general form to that of other species of the genus, but somewhat stouter. It feeds on grasses. The chrysalis is pale brown, mottled with darker brown.

The insect ranges through Canada and the United States to Nebraska, Kansas, and Texas.

(5) Neonympha mitchelli, French, Plate XXV, Fig. 6, 3, *under side* (Mitchell's Satyr).

Butterfly.— Easily distinguished from the other species of the genus by the eye-spots on the under side of the wings, four on each of the primaries and six on each of the secondaries, arranged

in a straight series on the outer third, well removed from the margin. These spots are black, ringed about with yellow and pupilled with blue.

Early Stages. — Unknown.

The species is local, and thus far is recorded only from northern New Jersey, near Lake Hopatcong, and the State of
